LAUNDRY TALK

(By B. T. Gentges.)
(Continued from last week.)

During the World War this country began making dyes, which were inferior to the imported article, and the result was that laundries had troubles of their own. There are some goods in use, and on the market to this day, that have these dyes in them, but they are gradually disappearing.

C. J. Harrelson spent last week with his son, Dr. E. W. Harrelson, a New Madrid dentist, who has a very good practice there. While there Mr. Harrelson met Geo. Rickus, Jr., son of Geo. Rickus, of Copenhagen, who is paying \$5 cash rent on 300 acres a short distance from New Madrid. Mr. Rickus informed him that he had 80 acres in sunflowers the past season, from which he secured 60,000 pounds of sunflower seed, which he sold for \$3.50 per 100 pounds.

The Fredericktown ball team played the Bonne Terre team a game Sunday afternoon, on the latter grounds, to a fair gathering of fans, and returned home with a defeat registered up against them. The report was current there before the game started that Fredericktown had not been defeated this season, so that a much better game was expected than the sample they handed out there. Most of the visitors played like veriest amateurs, though their pitcher did splendid work, notwithstanding the poor support he received.

The 21st Pythian Association held its semi-annual meeting at Ironton Sept. 20th. It was one of the largest attended for several years. Important matters pertaining to Pythianism were discussed and a resolution was submitted by the association to abolish the office of State Deputy Grand Chancellor, which was almost unanimously adopted. The night session comprised work in the rank of Knight. Quite a delegation of members from Farmington and the Lead Belt attended. The next semi-annual meeting will be held March 21, 1923, at DeSoto.

A committee of three was appointed at the recent meeting of the Chamber of Commerce, by President Cayce, to co-operate with a similar committee from the High School, to look after the financial end of the High School foot ball season, to see that the team is not restricted in a financial way to handicap them in obtaining the best possible results. That committee was composed of Rolla Cozart, E. J. McKinney and Harry Denman. Mr. Cozart, the chairman, thinks better results may be secured by increasing that committee to five. Therefore he has appointed Taylor Smith and George Morris to serve on that body.

About 4 o'clock Saturday afternoon considerable excitement was created about the City Cash Store when a considerable volume of smoke began issuing from the ventilator under the ground floor on the east side of the building. The hose cart was immediately brought out, and the firemen at once began tearing holes in the floor of the rear of the room occupied by the City Cash Store. But the water was not turned on, for the reason that no flames were discovered under that floor. Further investigation seemed to account for the vast amount of smoke that was there caused by the fact that there was a fire in a stove in the rear of the adjacent barber shop, and that the smoke had in some manner entered a ventilator hole on that side of the building, and that the draft caused it to exhale on the street side in alarming volume. But little damage was caused from the several holes that were torn in the floor.

From reports that have reached The Times, W. A. Brookshire, of this city, candidate for State Senator, created a very favorable impression among Democratic leaders at the meeting of the State Committee at Excelsior Springs last week. While he is perhaps the youngest Democratic candidate for the State Senate, he was given a place on the committee to prepare a tentative program for that meeting, being the only member on such committee standing for office beneath Congress. Among his co-workers were such men as Judges Graves and Walker, Senator Reed, Congressman Rubey, Mrs. St. Clair Moss, Congressional nominee from the 8th District; Ralph Lozier, Congressional nominee from the 2nd District, and J. Scott Wolff, nominee from this Congressional District. The Times also understands that it was largely due to Mr. Brookshire's ability and activity that both of President Wilson's administrations were endorsed. The ability he has already demonstrated as being the possessor of clearly indicates that his nomination for the State Senate was a wise selection.

Motor Trucks Extend Food Supply Radius 50 Miles

HERBERT HOOVER says: "The motor truck has given every town an extended radius of food supply by some 50 miles, and thereby protects such vital matters as milk and perishables."

Formerly 10 miles was as far as the farmer could profitably haul his produce. The increasing number of motor trucks on the farm is making the farmer more and more independent of other forms of transportation. It is extending a primary market five times, giving the farmer greater security and doing much to insure him the full profit from his crops and produce.

E. E. La Schum, Superintendent of Equipment of the American Railway Express Company, says that while the average mileage of trucks is about 40 miles per day, they are capable of making 100 miles without undue strain.

This means that in every truck there are 60 unused daily transportation miles, which can be used when emergency calls.

The farmers of the 10 states served by the Standard Oil Company (Indiana) own 46,582 trucks. These represent unused, potential transportation of 2,794,920 miles per day—quite enough to make the farmer feel reasonably independent and to make the city dweller secure.

The value of these trucks to their owners, and to the community, depends upon an ample supply of gasoline and oils, instantly available when needed.

The Standard Oil Company (Indiana), recognizing its duty to the public, has organized its distributing facilities to a point where only a complete breakdown of public utilities can prevent its supplying these trucks with oil and gasoline needed, no matter in what corner of the 10 states they may
